PROFESSIONAL PROFILE

IT Systems Technician and Software Development Technology student with experience in technical support, equipment maintenance, networking, and application/script development. I have worked with Python, Java, JavaScript, C++, and SQL, along with technologies such as FastAPI, React, JSP, MySQL, PostgreSQL, MongoDB, and OpenCV. Primary focus on remote development, automation, data analysis, and practical business-oriented solutions.

KEY SKILLS

- Backend development and APIs
- Data analysis and SQL
- Python automation
- Frontend web development
- Technical support and networking
- Git, GitHub, and collaborative work

PROFESSIONAL EXPERIENCE

Support and Maintenance Technician | Sala Café Internet FEB | Feb 2023 - Dec 2024

- Performed installation, configuration, and preventive/corrective maintenance for computers, printers, and Wi-Fi routers.
- Provided technical support to users for hardware, software, and connectivity issues.
- Installed cameras and supported basic networking tasks in customer-facing environments.

Independent Electronics & Home Automation Technician | Independent | Sep 2023 - May 2024

- Installed and supported networking and electronic devices.
- Assisted with basic device configuration and connectivity solutions.
- Handled technical client requests with a focus on quick problem resolution.

Waiter | Ice Cream Shop | Dec 2023 - Mar 2026

- Managed orders, payments, and customer service, strengthening communication and service skills.

FEATURED PROJECTS

ForenSys - Vision | Personal Project | Python, FastAPI, OpenCV, SQLite

- Developed a video surveillance identification system with facial recognition.
- Implemented the backend with FastAPI and local persistence with SQLite.
- Integrated OpenCV and facial recognition libraries for the image-processing workflow.

ForenSys - Lab | Personal Project | Python, FastAPI, SQLite

- Developed a fingerprint identification system.
- Organized data handling with FastAPI and SQLite.
- Designed the solution with a focus on evidence registration and consultation.

ConsulTex - Medical Web App | Personal Project | Java, JSP, Servlets, MySQL, MVC, DAO, TailwindCSS

- Built a medical web application using MVC architecture and the DAO pattern.
- Implemented user authentication and data persistence in MySQL.
- Developed the frontend with HTML, CSS, JavaScript, and TailwindCSS.

Benedicto - Jewelry | Personal Project | HTML, CSS, JavaScript, PostgreSQL

- Developed a business website connected to PostgreSQL.
- Designed an interface focused on product catalog and presentation.

- Applied JavaScript to improve page interaction.
- LawLabLu | Web Project | HTML, CSS, JavaScript, Google Sheets
- Developed a static website integrated with Google Sheets.
 - Worked with 3D object interaction (.glb) for a more visual presentation.
 - Focused on a clear, fast, and functional user experience.

EDUCATION

Software Development Technology – Universidad del Valle | In progress

- Training in analysis, programming, Python, Java, C++, databases, and cybersecurity.

Judicial Investigation and Criminalistics Assistant – Cestelco Buga | In progress

- Knowledge of laws, chain of custody, and evidence gathering.

IT Systems Technician – Discenter's Buga | 2021 - 2023

- Hardware and software support.

Academic High School Diploma – Institución Educativa Alfonso Zawadzky | 2011 - 2022

COURSES & CERTIFICATIONS

- SQL Relational MongoDB (2026)
- Introduction to the Threat Landscape 3.0 – Fortinet (2026)
- Introduction to Data Science – Santander Open Academy (2026)
- Fundamentals of Project Management (Scrum) – Santander Open Academy (2026)
- Fundamentals of Data Analysis – Microsoft (2026)
- HCIA-Big Data V.3.5 – Huawei ICT Academy (2026)
- AWS Cloud Security – AWS Academy (2026)
- NDG Linux Unhatched – Cisco Networking Academy (2025)
- Introduction to Cybersecurity – Cisco Networking Academy (2025)
- Cyber Threat Management – Cisco Networking Academy (2025)
- Basic Python – EDTEAM (2023)
- Intermediate Excel – EDTEAM (2023)
- English A2 – EDTEAM (2023)
- Arduino Robotics – SENA (2022)

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, JSP, HTML, CSS, React

Backend / frameworks: FastAPI, Servlets, Tomcat, MVC, DAO

Databases: MySQL, PostgreSQL, MongoDB, SQLite, SQL

Data & Office: Excel, Google Sheets, data analysis, pivot tables, charts

Tools: Git, GitHub, Linux, Kali Linux, Arduino

Support & networking: Equipment maintenance, Wi-Fi routers, cameras, troubleshooting

Cybersecurity: threat management, risk analysis, Linux security concepts

LANGUAGES

- Spanish: Native
- English: B1 (Intermediate)

PROFESSIONAL FOCUS

Targeting remote roles in software development, data analysis, technical support, automation, and related systems positions.
